

Foam Backing Rod

Compressible foam joint packing strip

"maintenance made easy"

PRODUCT DESCRIPTION

Polycote Foam Back Rod is a high quality, non-rotting foam suitable for a wide variety of uses. It is mainly used for filling expansion joints prior to the use of a suitable joint filling product.

It enables deep joints to be filled to a consistent depth with Jointex compounds without waste or loss of material.

PROPERTIES/ CHARACTERISTICS

- Closed cell
- Cross-linked
- Does not rot
- Physically and chemically neutral
- Thermal conductivity:
0.04 w/mK @ 20°C
- Water vapour transmission: less than
4g/m²/20mm
- Water absorption: less than 1% v/v
after 24 hours total immersion
- Density: 35kg/m³ approx
- Heat shrinkage: after 96 hours @
80°C – less than 1%

AVAILABLE SIZES

- 15mm diameter
- 20mm diameter
- 30mm diameter
