

# Securigate

**A quick and easy access barrier,  
requiring no top or bottom track**

**“maintenance made easy”**

## PRODUCT DESCRIPTION

**Securigate is designed for applications where aesthetics are a key consideration. There is a choice of locking systems and unlike conventional retractable gates, Securigate does not use top or bottom tracks making it easy to operate.**

**The square steel lattice sections are connected by high tensile rivets and allow the Securigate to fold up to just 15% of its locked size. In addition, a unique hinge aside facility enables each sash to turn through up to 180 degrees, thus enabling unrestricted access to be retained.**

**All components are phosphate treated and finished in a resilient white gloss coating. Securigate provides an attractive visual deterrent against traditional break-in methods.**

**The wide range of standard stock sizes can be quickly and easily fitted in almost any setting with no tracks or other fittings to obstruct the display of goods.**

- Diamond mesh collapsible gate, available in 7 standard widths and 2 heights (2 metres & 2.5 metres).
- Securigate can be cut down in height for an extra charge.
- Security can be further enhanced with the addition of specific brackets.

### Effective

Made from rolled steel, Securigate acts as a visual deterrent to opportunist thieves or as an effective barrier for access control.

### Versatile

The Securigate range offers a complete solution across a wide range of applications and can be used to offer differing levels of security. This includes warehouses, factories, commercial buildings, retail, pharmacies and hospitals.

## PRODUCT DESCRIPTION *Cont.*

### Flexible

The off the shelf design and trackless system ensures that Securigate is easy to install and operate. A barrier can be created quickly and easily but can also be stored neatly when not in use.

### Aesthetic

The diamond design creates an aesthetically pleasing, unobtrusive look in any application. When not in use the system can be folded away for maximum visibility.

### Ventilation

In applications where security and ventilation are of equal importance, the Securigate range offers the perfect solution.

Used across a range of applications including pharmacies, catering facilities and factories, the diamond design creates an effective barrier whilst allowing for maximum air-flow.

### Fast turn-around

Securigate is available 'off the shelf' and is an ideal solution for projects requiring a fast turnaround.

### Cost-effective

Available in a range of stock sizes this is a low cost physical security solution.
